

Let's Talk About Teeth

By Leon D. Hanna, DDS & Kayla S. Mazer, DDS

TO A BRIGHTER FUTURE

White teeth and bright smiles are no longer reserved for celebrities. By removing the yellow/brown discoloration associated with smoking, coffee/tea drinking, and food staining, the dentist can make your teeth two to six shades whiter. There is the option to use a professional-strength peroxide; which is held in place on the teeth with a custom-fit mouthpiece. This process can be continued at home, where the teeth-whitening agent is applied overnight. For faster results, the dentist may also use a laser in office. This technique involves leaving only tooth surfaces exposed; which are then covered with a whitening gel that is activated with laser impulses. In less than an hour, laser teeth whitening produces unsurpassed results.
